Rob-

Hi! I just wanted to write you a quick to say how happy we are with our garage. We were very apprehensive at first to have something of this size built; you were very comforting and patient with us. The time you took to keep us updated on any delays was a pleasant surprise—we've heard horror stories of other contractors not showing up and never calling.

As I observed you and your crew work, I was impressed that you hand-picked every stud, not ordering a whole lumber pack like other framers. Even after that, you inspected each piece of wood and set aside the ones that did not meet our standards. You're crew is very professional and courteous (Kermit is especially great!). I feel you have old-world craftsman standards and integrity. We love our garage and have received many compliments from friends and even other contractors. Thanks again for your great service and great finished product.

Sincerely,

Daniel and Sarah Hankins
